Welcome to “Extreme Cash Mission” Method.

Hi, G. Pall here.

I am an internet marketer. I simply create streams of revenue online that take me 1-5 hours a week to maintain...

So I can do what I love in life...

Here's one I wanted to share with you.

Yes, a course that actually works, as in I use this method to get me TONS of sales and you can do, just copy exactly how I have set up here Ok?

Let's go.

What we are going to do here is target a very specific group and sell them products, and they will LOVE these products, watch how crazy this is, and how many sales can quickly happen in just 24 hours, I'm telling you right now, this method ROCKS and you can literally build an entire 6 figure business with this 1 method...

To sell people our products though, we need a place to add our products on and collect sales, for that we will use a platform called Shopify.

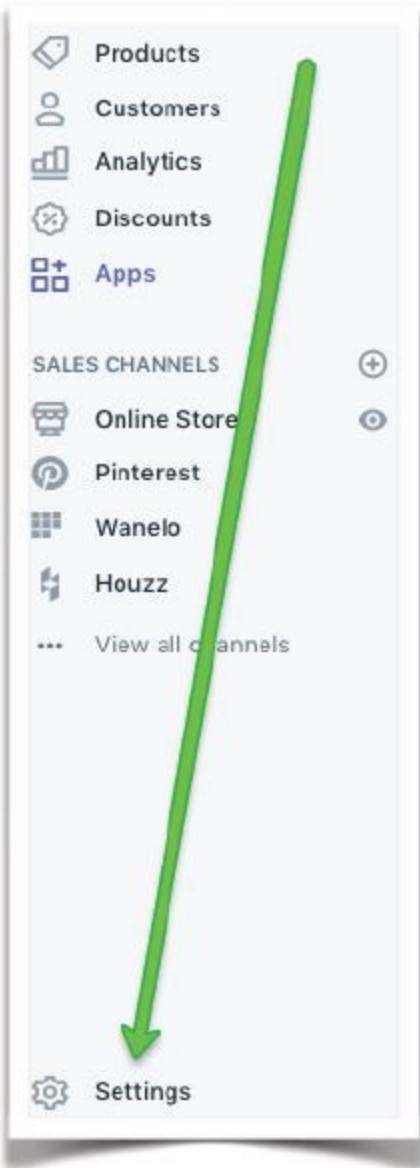

## The ecommerce platform made for you

Whether you sell online, on social media, in store, or out of the trunk of your car, Shopify has you covered.

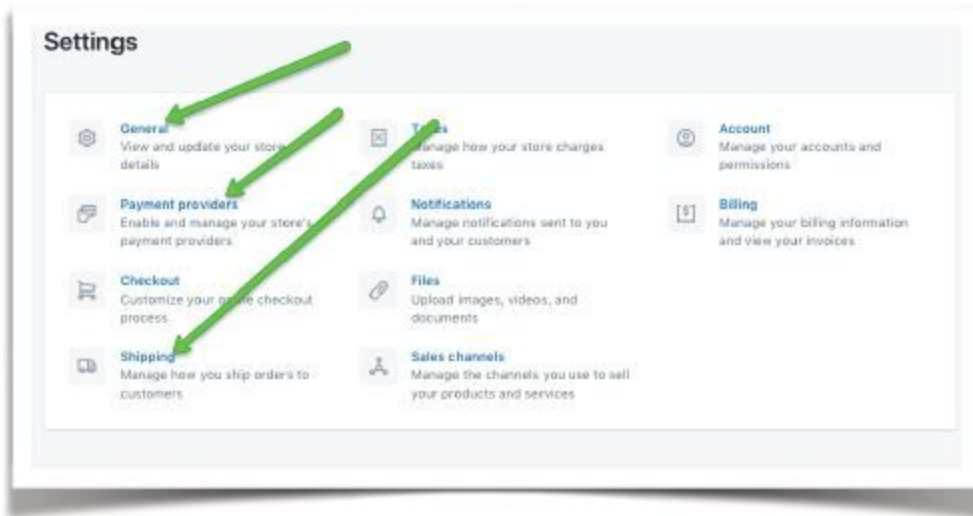

Get started

Try Shopify free for 30 days. No risk, and no credit card required.

[Click here to Sign up first](#), (free for first 14 days)

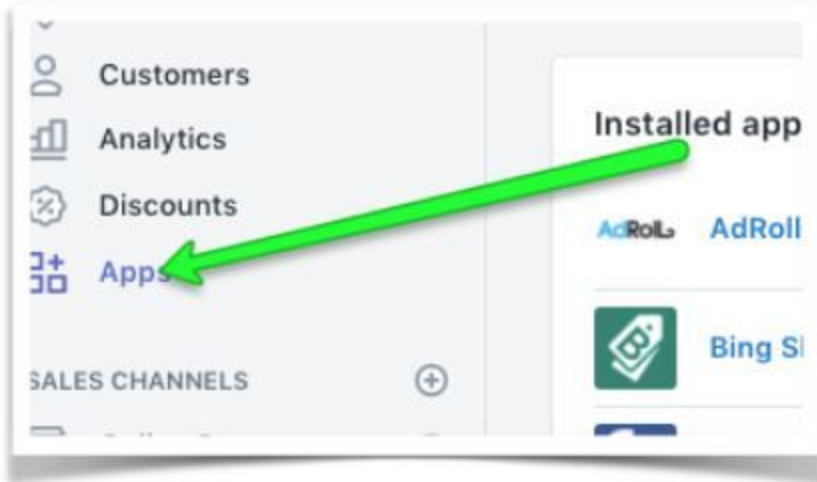

Click Settings

Go into General, name your store, well something general, so you can sell anything in it...such as, World of sales.com.

Payment, add methods to take payments such as paypal, shopify payments etc. So you can collect money.

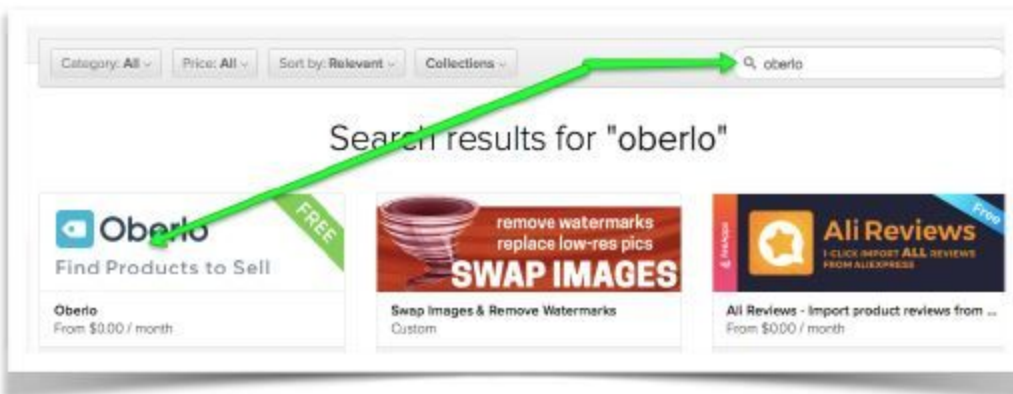

Shipping, set your shipping at \$5.99

Click Apps

Click Visit Store

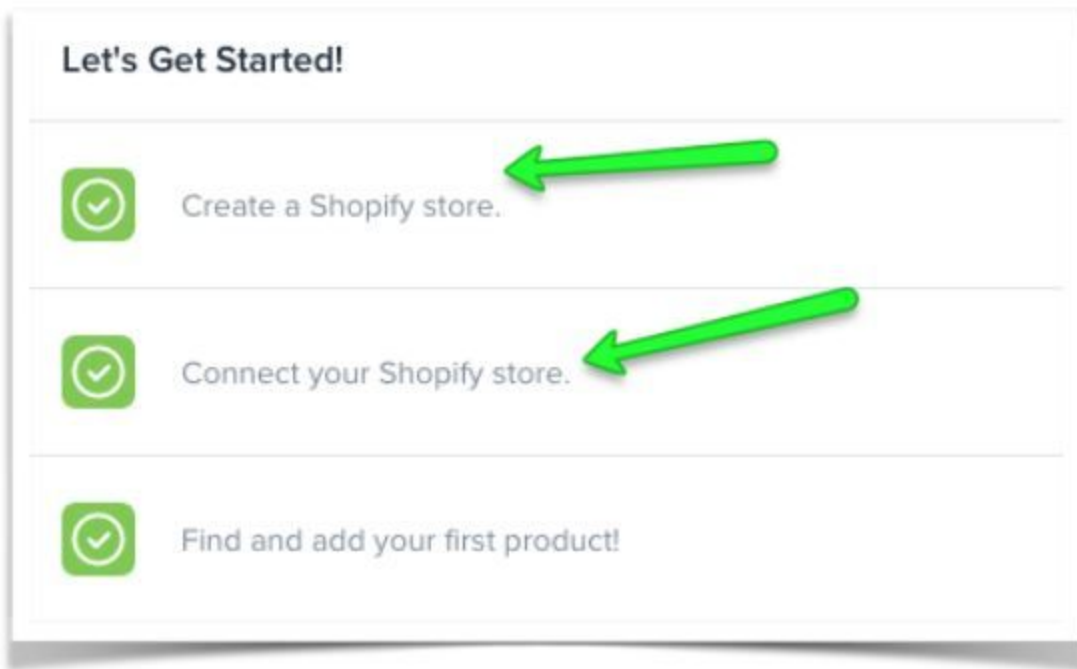

You may have seen me do courses on Oberlo before, follow along this method is 100% different to get sales, works 100%.

Search for Oberlo, then click on it.

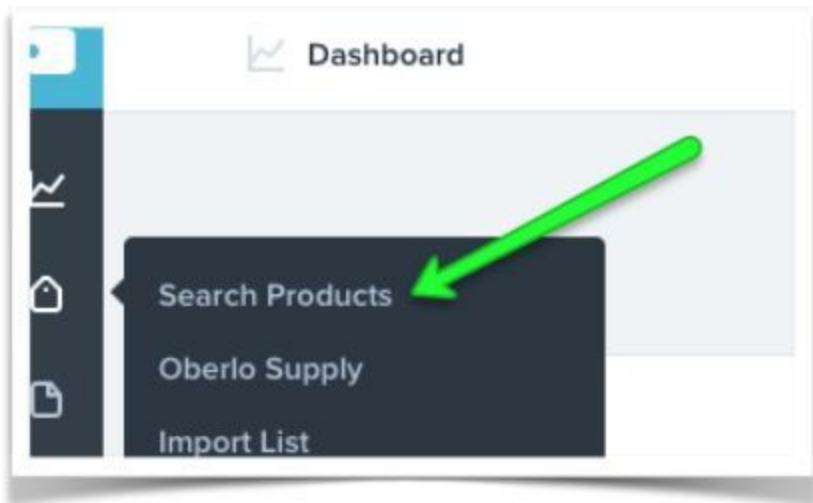

Click get, what is happening? Oberlo makes it SUPER easy for us to add products to our store, when people buy from your store, you can then go thru Oberlo to add their payment info, the supplier then sends the product to your customer for you, you touch nothing ok?

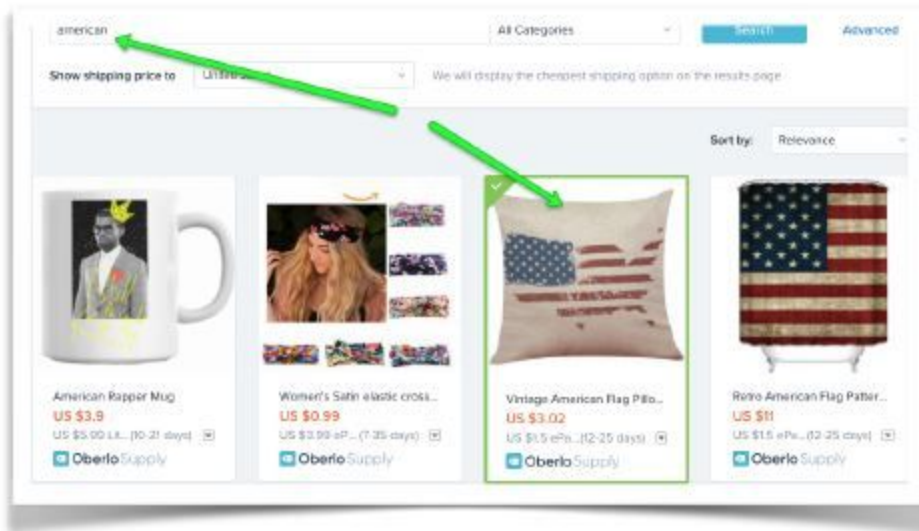

Finish the set up

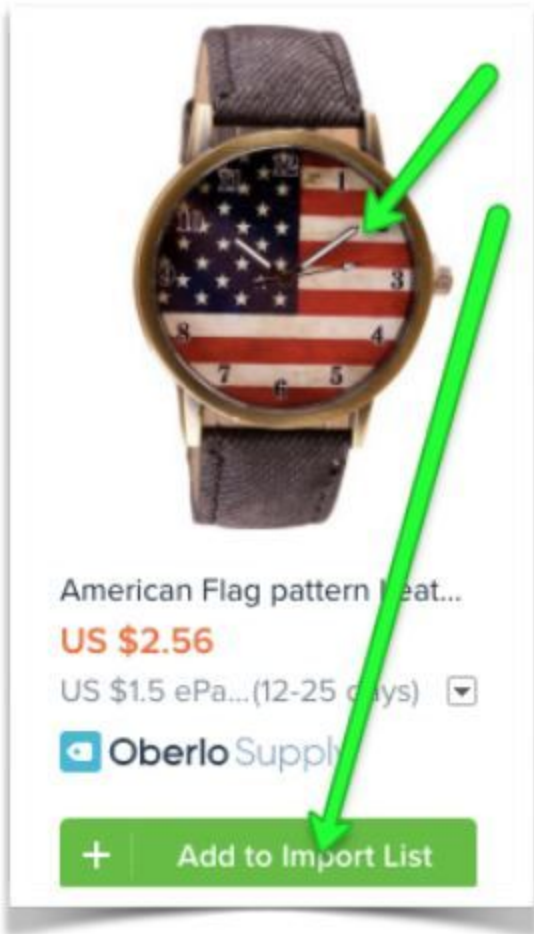

Search for products, click here

We are going to target people who are from one country, yet live in another. Again, I'm telling you, DO NOT just blow this method off or think you know and have tried everything, I get CRAZY sales doing this, so follow along!

Search for any country here, America, UK, Brazil, Israel, I don't care what it is, we are going to target Americans that live in UK or Americans that live in Australia, or Brazilians who live in Israel etc. The possibilities with this are MASSIVE, you can scale crazy.

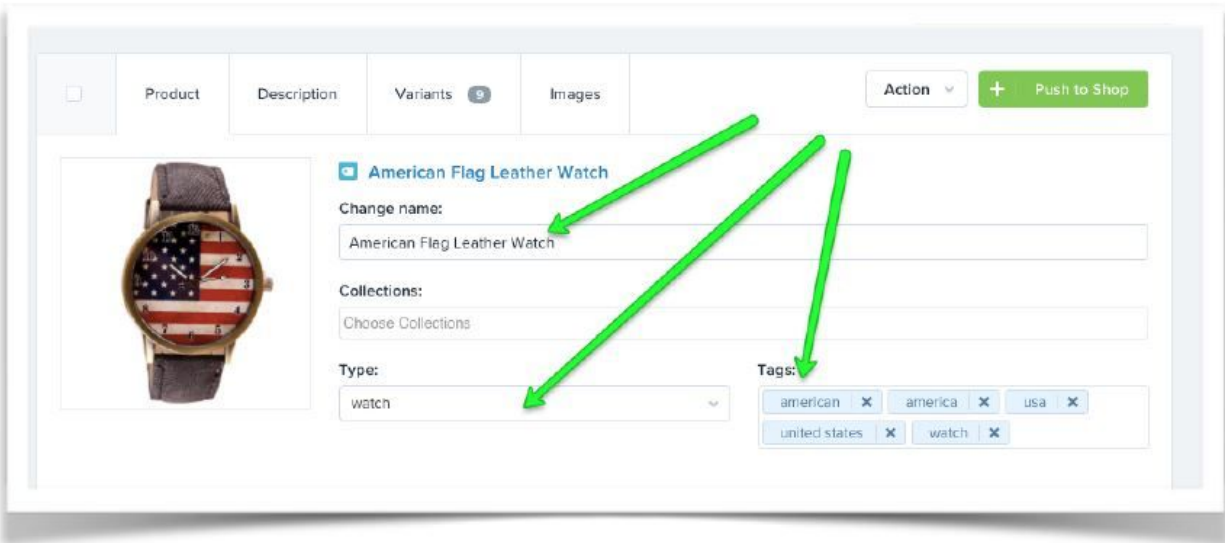

For the example though, I'm using Americans.

So simple click Add to Import List on the products you want to add to your store, it can ANYTHING as long as it is patriotic, use that countries flag and or country flag colors. It can be watches, stuffed animals, hats, pillows, ANYTHING, they sell like mad because imagine this. You are and live in another country, all the sudden you see an ad for a watch with your country flag and colors on it! How more likely are you to buy that, then if you seen the same watch in your home country? This works insane.

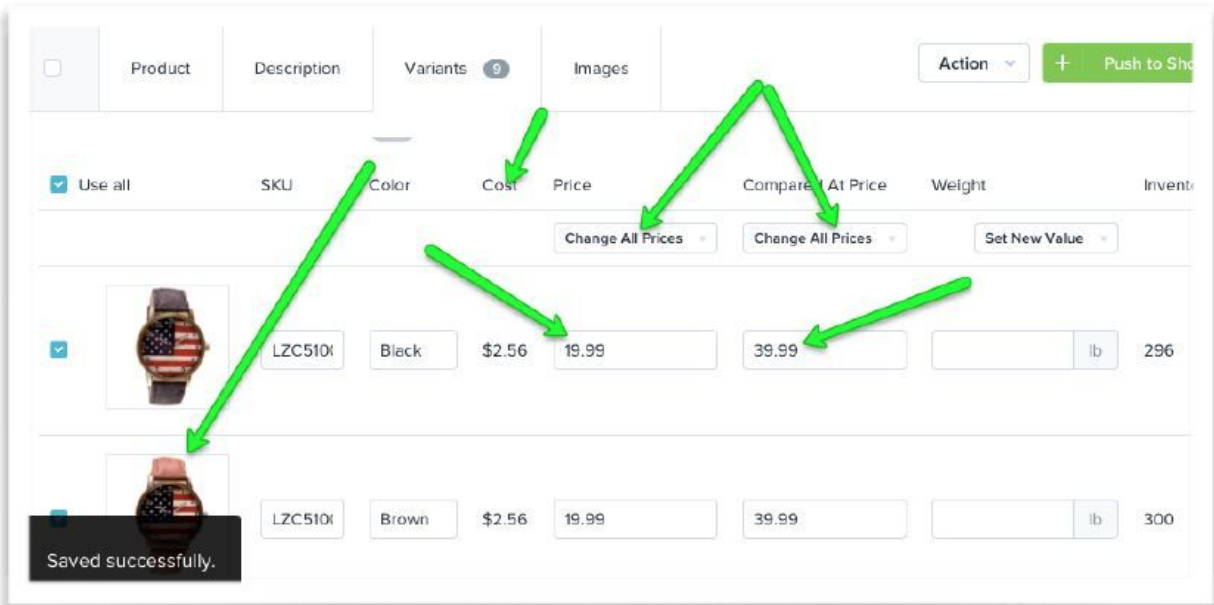

Click on Import list at the top.

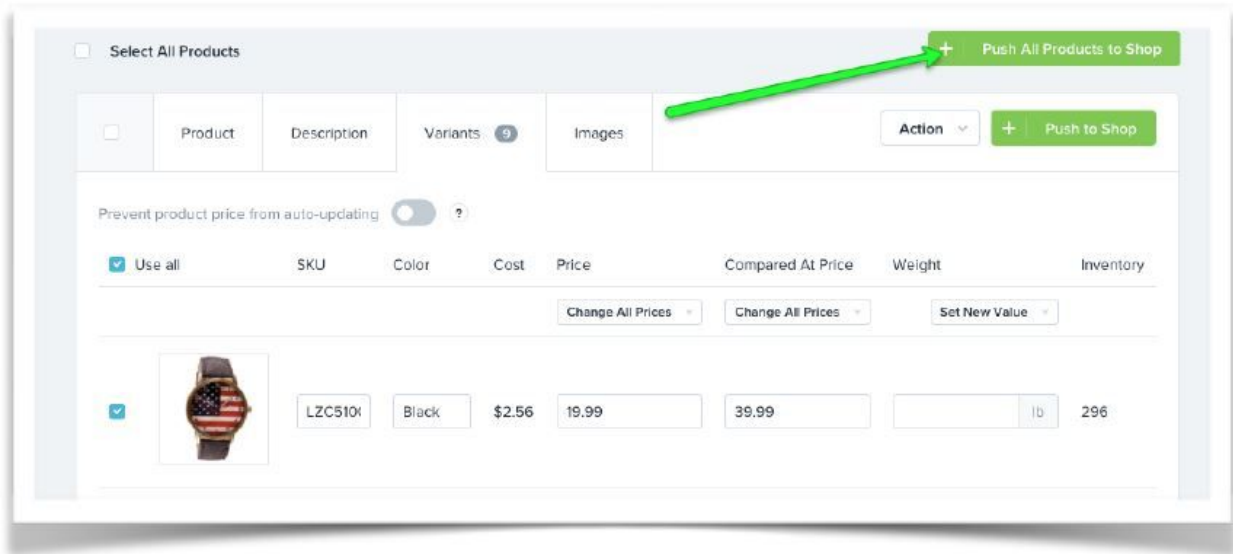

Go thru and rename the title to what the product is, keep it simple.

Type: the type of product your selling, watch, blanket etc  
Tags, how people might find your product, USA, America, watch, American etc.

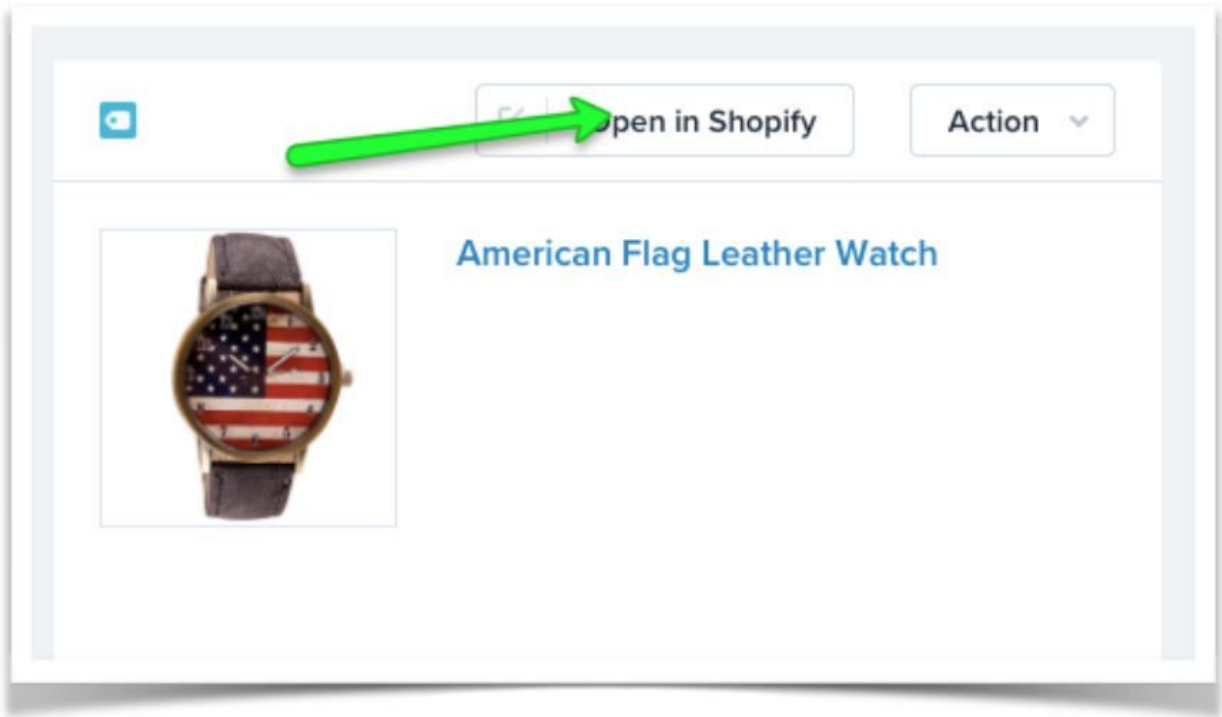

Go to Variants, next tab over, Oberlo will already have prices in there for you, you can go add your own, think about how much you might find the product for retail in the mall, not on sale, price it at that. It's not like people in Australia can easily go in the mall and find a Brazilian watch right? So we charge a good price for it.

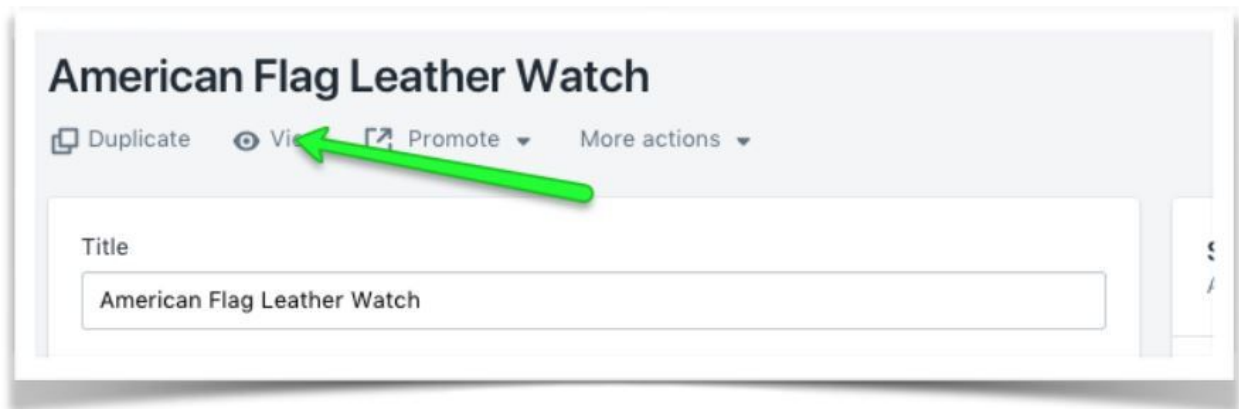

You can click Change All Prices, and it will change all prices for the variants if you have any, (size colors etc). Same for compare at price, just put a higher price here so they know they are still getting a deal. Once done with all your products or just your one, click Push All to Shop.

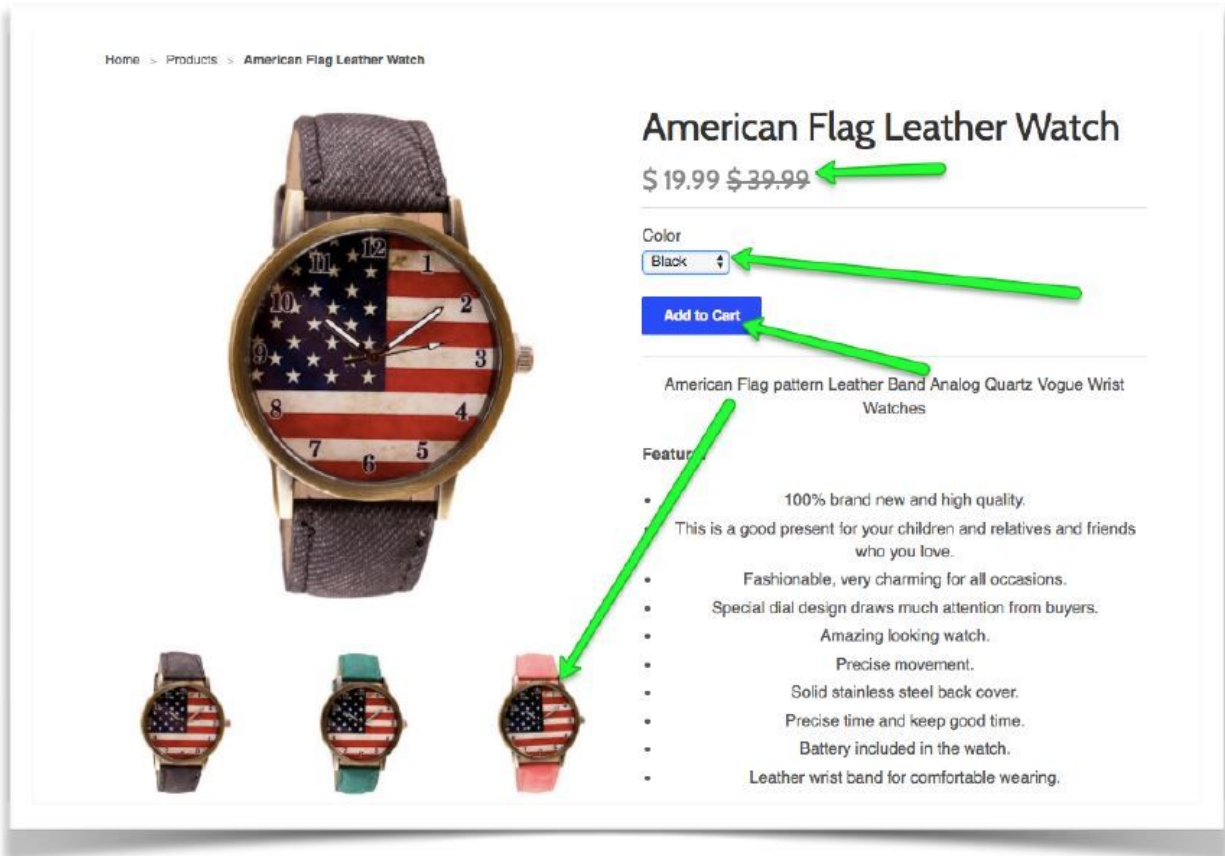

Click on My Products

Click Open in Shopify

Click view to see our already made product page

You see with just a few clicks we added pricing, images, everything, even available in multiple colors ready to buy now.

Traffic, oh yes now we need some traffic going to our site, this is the 2nd part of the course that SMASHES it! And this this new edition Facebook has, it's gonna murder it.

If you have not ever used Facebook Ads, sign up here it's free to sign up <https://business.facebook.com>

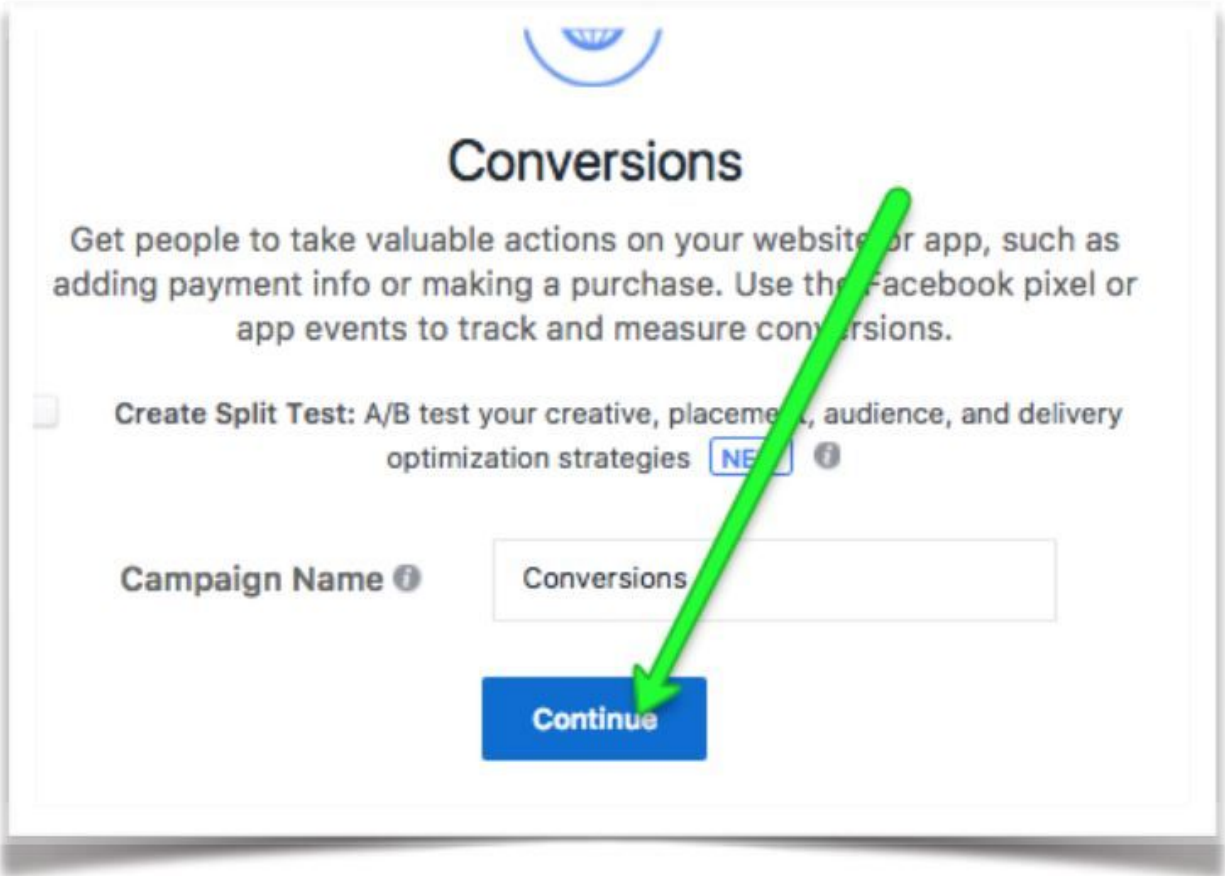

Once signed up click on Create Ad in the right side.

Choose Conversions

The image shows the Facebook 'Conversions' setup screen. At the top, there is a blue smiley face icon. Below it, the heading 'Conversions' is centered. A paragraph explains that the goal is to get people to take valuable actions on a website or app, such as adding payment info or making a purchase, and that Facebook pixel or app events are used to track and measure conversions. There is a checkbox for 'Create Split Test: A/B test your creative, placement, audience, and delivery optimization strategies' with a 'NEW' badge and an information icon. Below this is a 'Campaign Name' field with an information icon, containing the text 'Conversions'. At the bottom, there is a blue 'Continue' button. A large green arrow points from the top right towards the 'Continue' button.

## Conversions

Get people to take valuable actions on your website or app, such as adding payment info or making a purchase. Use the Facebook pixel or app events to track and measure conversions.

Create Split Test: A/B test your creative, placement, audience, and delivery optimization strategies **NEW** ⓘ

Campaign Name ⓘ

**Continue**

Click Continue

The image shows the Facebook conversion event selection screen. At the top, there is a line of text: 'a pixel or app event, you'll see instructions for creating one.' Below this, there is a radio button for 'Website'. Underneath, there is a list of conversion events. The 'Purchase' event is selected, indicated by a green dot. The 'Purchase' event is shown in a grey box with a green dot, an 'x' icon, and an information icon. A large green arrow points from the top right towards the 'Purchase' event. Below the list, there is a paragraph: 'We'll optimize delivery of your ads to get the most of these conversions at the lowest cost.'

a pixel or app event, you'll see instructions for creating one.

Website

- Purchase ⓘ

We'll optimize delivery of your ads to get the most of these conversions at the lowest cost.

Choose Purchase here, You MUST have a Pixel installed, if you don't click here to see how, it's very simple just adding a number to your Shopify Platform, once you do that, continue here.

The image shows a screenshot of the Facebook targeting interface. At the top, the location is set to "United Kingdom". Below this is a map of the United Kingdom with a location pin. Underneath the map, there are options for "Age" (18 - 65+), "Gender" (All, Men, Women), and "Languages" (Enter a language...). Below these are the "Detailed Targeting" options, which are set to "INCLUDE people who match at least ONE of the following". The selected targeting option is "Behaviors > Expats", with "Expats (United States)" selected. Green arrows point to the "United Kingdom" location, the "Age" dropdown, the "Gender" dropdown, and the "Expats (United States)" option.

United Kingdom

Include | Type to add more locations | Browse

Age 18 - 65+

Gender All Men Women

Languages Enter a language...

Detailed Targeting INCLUDE people who match at least ONE of the following

Behaviors > Expats

Expats (United States)

Add demographics, interests or behaviors | Suggestions | Browse

So remember how this works, we are going to target people from one country that live in another. Facebook has crazy data and can find these EXACT people for us.

So let's say you choose Brazil as your product, you can then go to Germany as the target country as in, you are targeting people from Brazil that live in Germany.

In my example I'm targeting Americans that live in the UK. Keep age 18+, Male and Female (I don't care what you're selling keep it like this!) Type in Expats, then the people in the "from" country, example I'm targeting Americans in the UK so I type in USA.

## Placements

Show your ads to the right people in the right places.

**Automatic Placements (Recommended)**

Your ads will automatically be shown to your audience in the places they're likely to perform best. For this objective, placements may include Facebook, Instagram, Audience Network, and Messenger. [Learn more.](#)

**Edit Placements**

Removing placements may reduce the number of people you reach and may make it less likely that you meet your goals. [Learn more.](#)

## Budget & Schedule

Define how much you'd like to spend, and when you'd like your ads to appear.

Budget ⓘ

Daily Budget \*

\$5.00

\$5.00 USD

Actual amount spent daily may vary.

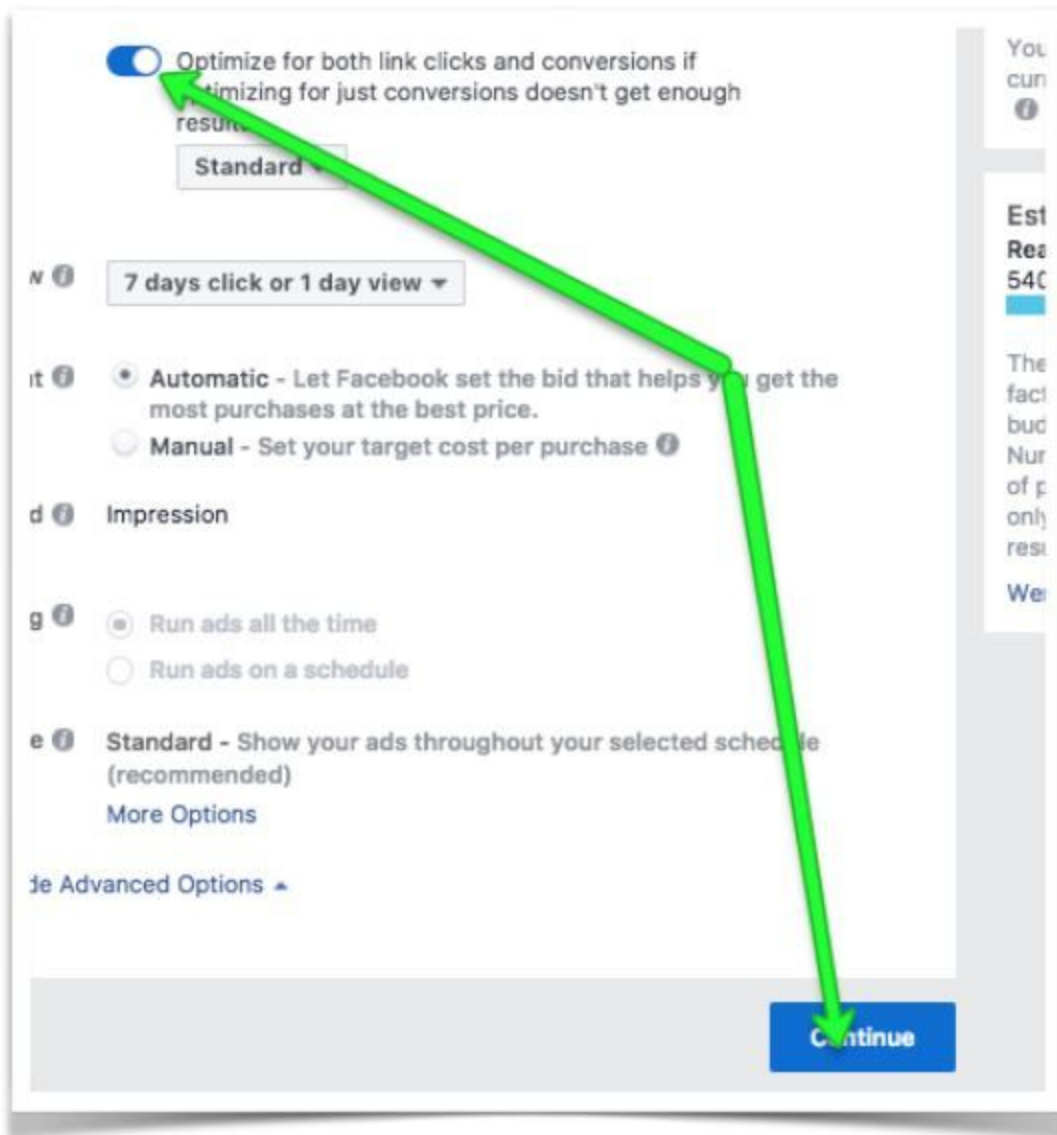

Schedule ⓘ

Run my ad set continuously, starting today

Set a start and end date

You'll spend no more than \$35.00 per week.

Show Advanced Options ▾

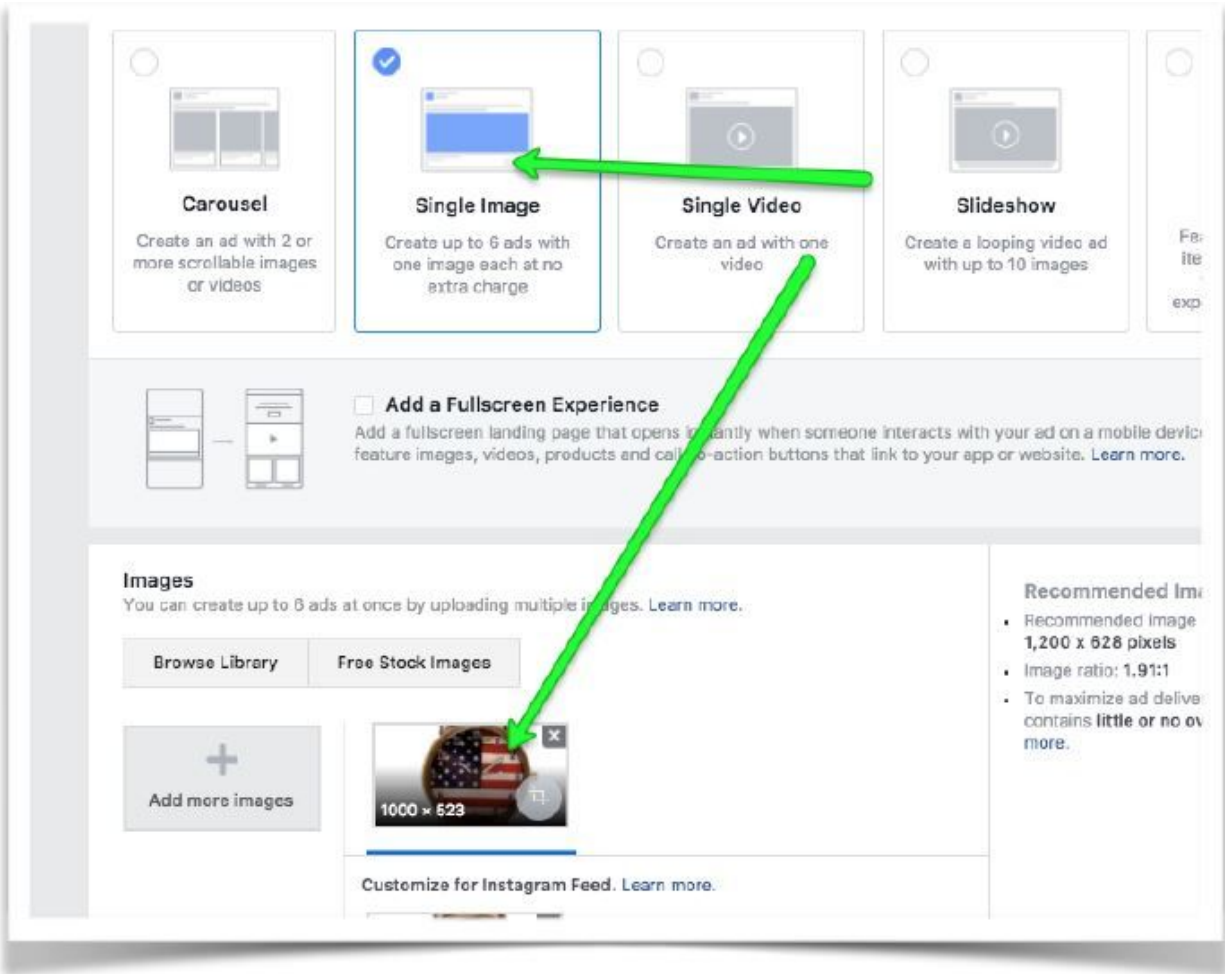

Remember now do EXACTLY as I say, so Auto placement, \$5 a day, then click Show Advanced.

Click Optimize then Continue. (no one else is doing this step, you're already smashing).

Go back to your product page on your Shopify store you're promoting, copy the url, then also save the main pic, right click then save as.

Click Single Image, then drag and drop your image here from your product page.

The screenshot displays the Facebook Ad Manager interface for creating an ad. The left panel, titled 'Links', contains the following fields and options:

- Destination:** Website URL: watches.com
- Headline:** American Flag Watch
- Text:** Show your Love, get this unique leather American Watch today, click shop now
- Call To Action:** Shop Now
- Multiple Languages (optional):** + Create in Different Languages

The right panel, titled 'Ad Preview', shows the ad as it will appear in an Instagram feed. It features a watch with an American flag face and a leather strap. Below the watch, the text 'Show your Love, get this unique watch today, click shop now' is visible, along with a 'Shop Now' button and social media interaction icons (heart, comment, share, bookmark).

Create your ad here, enter the url of the product you're promoting, use exact url, Headline, just what the product is, Text, add something catchy here, with saying Click Shop now to buy, (add the shop now icon from the drop down box) Multiple Languages -you can go on fiverr and have someone translate that ad to another language, example,

you are targeting Brazilians in Germany, get it in Portuguese. Click Confirm and your ad is done!

Your ad will be approved quickly, mine is instantly, if you have a new account for Facebook just give some time. How much to spend to test to see if your product is selling, not much at all for these products since they sell super well.

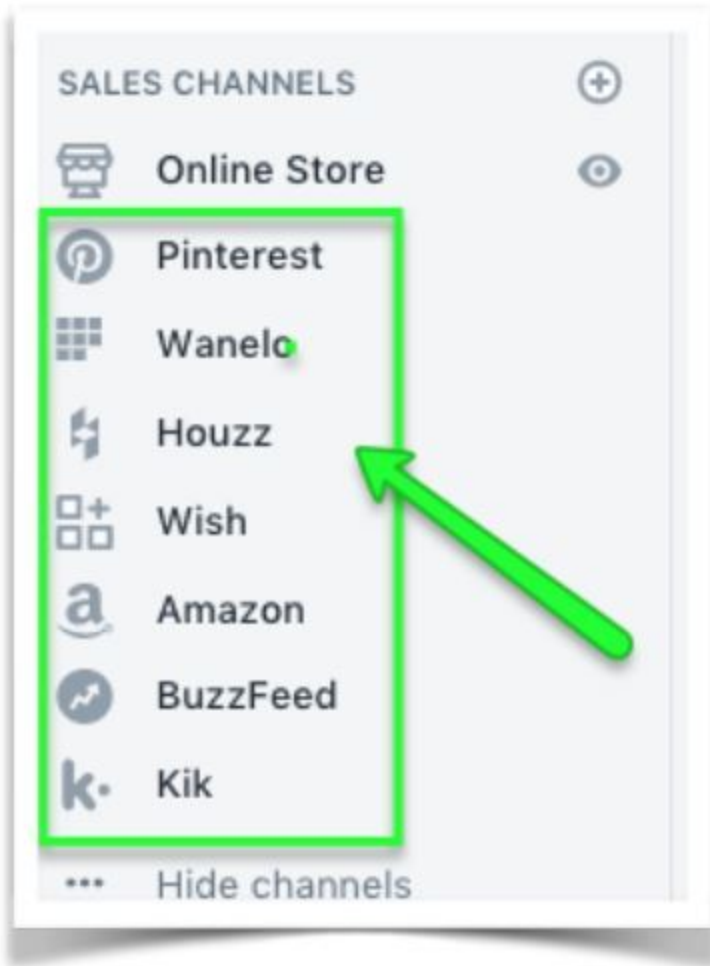

You will know very fast if they are selling or not. So we will use this equation.

Let's say your item is \$20, you will test 1-2x the price of your item, so \$20-40, at \$5 a day that's 4-8 days at \$5 a day to test it, if no sales, move onto the next item. I like to go 2x myself so Facebook can find the buyers for you.

This is ALL about testing ok? Don't test one item then say oh this doesn't work I only have zero or 3 sales. I'm telling you right now, you could get one item to SMASH very quickly you just have to test, one item, just one product can get you to 10k per month, this is serious. STOP jumping from one method to the next, keep your store and hammer this method ok?

Once you find say, your product is smashing in the UK targeting people from Germany, you know having a buying audience, you can sell more stuff too, so target that same audience with a different Germany flag product, they will mostly buy that too.

BONUS, if you got my courses before you know I smash also with free traffic methods. Since you already have your products listed, lets get FREE traffic to it along with the paid, DO BOTH! Free is great, but with the paid traffic you can ramp right away to 10k a month + when you have a winner.

I want you to go back to your Shopify home area, on the left side click on Sales Channels, then I want you to add EVERY ONE OF THE channels that are available in your country.

This is FREE traffic and I get tons of sales from them along with my paid ads, imagine that, your product for free on all the sites and apps that get MILLIONS OF people

each month, you only pay a small % when you make a sale.

Let's go over the process again:

1. Sign up for Shopify
2. Get Oberlo app
3. Add Country related products only
4. List on Facebook ads targeting Expats
5. Set up free traffic channels
6. Make sales
7. Fill sales thru Oberlo channel thru the supplier
8. Keep profit
9. Repeat

Final thoughts...

So, as mentioned KEEP adding more products, keep testing \$5 a day at a time, you NEVER know what product is going to sell the best ok? It might be your 8th product making you 10k per month, but you stopped at 7, keep testing.

Surf more, market less.

To Your Success,

G. Pall
