

## Cha Ching Profit

Hey, I am A.I Saikat. Today I am here to show you some tricks/strategy to make instant money without selling anything.

And You don't need any website to do this.

Let's talk about the methods :

We will do CPA in a way that we don't need to sell anything.

For this we need a CPA Account.

Most of the CPA network doesn't approve new applicants. Plus they require very complicated Application process.

Most of the newbies fail due to problem with CPA network. So, It's a VITAL issue when working with CPA.

I won't promise you to get easy approval for any CPA networks. That's WHY I prefer the CPA network that doesn't REQUIRE approval process !

That's why We will work with CpaGrip

- A great CPA network which pays on time every time for last 5 years for me .

First You have to know how we will make money from CPAGrip.

UnLike Other CPA network, Cpagrip has the options to lock any content or files or url.

That means people have to do some tasks ( survey, zip submit, yes no questions etc ) to unlock those contents or files or url.

-----

This is very important to know.

So we will focus on some trending topics what people are crazy to download or watch.

And we will lock those files or urls in a tricks and force people to complete any of the free offers to unlock that and thus we make money.

Yes, The idea is very easy and simple !

And Ofcourse, It's very simple to do if you follow me !

It's very easy to earn \$50-\$80 per day with any of my tricks. And if you scale up, then \$150+ is possible !

If you are very newbie then watch tutorial on youtube by searching

'How to open Cpagrip account'

'How to use content locker in cpagrip'

'How to use url/file locker in Cpagrip'

These are very easy and available on Youtube so i am not want to wasting your time by elaborating this part. So let's talk about the methods.

Or, You can watch these tutorials as resource to start or to get IDEA :

⇒ [How to make money from CPAGrip Tricks Revealed 2019 Methods Earn \\$200 Daily](#)

⇒ [CPA Content Locking | \\$200 a day make money online | Cpa Grip | Ogads | Adworkmedia Cpa](#)

⇒ [CPAGRIP TOP SECRETS 2019 | MAKE MONEY ONLINE FAST](#)

### **Method 1 :**

This actually very very simple, but it works pretty well.

At the end of this method there is a tweak to help you make this in 2 minutes with a little investment.

First off, what's great about this method :

1. Highly scalable. If you upload just one video per day, that's 30 videos per month = \$900 per month (\$30/month average per video which is pretty modest)

2. Long term. One video I did this way has been earning me consistently since June 2018.

3. Newbie friendly.

4. I applied it myself and it WORKED, not just reposting something I found elsewhere.

### What you'll need:

1. A YouTube Account

2. A CPA Account

3. A decent internet connection to upload videos (not necessary if you're gonna apply the twist at the end of this method)

4. Probably less than an hour at any given time you'd like to apply it.

## Steps:

1. Take the time to think of a **highly demanded** "download" that is relatively old but still getting huge demand.

You can do this by searching songs (games, movies, songs anything!) on YouTube that are still getting comments till this date and has been uploaded in 2010 for example. (minimizes the chance of youtube taking it down A LOT)

2. Grab the video and **do some edits** in Camtasia Studio or other video editing software. You can also edit via Windows movie maker which is free and works awesome. We just don't want it to look like an exact duplicate.

3. [VERY IMPORTANT] Upload a landing page to your server, blogger blog, whatever. Should have a catchy design, simply put a big photo of the album/game whatever and list a bunch of features below it. Refrain from using any paragraphs or so, just list in bullet points. Now insert a download button and lock it down using a gateway.

4. Upload the video and use a description like "Since 2010 and they continue to be my favorite band! Awesome song. Btw you can download the FULL album in high quality mp3 through this site: [landing page link]" where you've locked the content or file.

5. Updated : As YouTube doesn't allow to use annotation, you should use call to action at the end of the video to see the link in description. this really helps skyrockets conversions.

6. Now your final step is some video promotion. To drive tens of thousands of visitors I simply used: youtube likes, comments, social bookmarking and bought yt views to give initial boost. Outsource them all from fiverr. Set the comments on manual approval and only approve positive comments (you will get many, believe me)

7. Rinse and Repeat! May seem complicated but by practice you get to do it pretty fast and it works.

Choose stuff that is relatively old but still highly demanded. All of this has its advantages. One more advantage of old stuff is there will be much less competition trying to get setup cpa gateways on old stuff.

Everyone is running after new things.

### Alternative method - investment required

I don't remember if this was posted before but it works pretty well and requires almost no offer.

- 1.** Find popular downloads as outlined above. Open a bunch of them in new tabs. Also the older the video the better. Try to ensure that the most recent comment is less than a week ago.
- 2.** Now open all the uploaders profiles of those videos and see the last time they signed in. If it's more than a week ago, I don't bother .
- 3.** PM them proposing to replace their download links with yours (cpa locked) in exchange for a flat weekly/monthly fee.

**4.** Many will reject, but many will also agree . It's free money for them.

**5.** Rinse and REPEAT!

Trust me, this is very effective and very FAST money you can ever imagine.

And you are not going to spend unless you're earning.

Tips: 1. There is also a nasty way to increase chances to uploader agreeing to put your link. You can report his as copyright crap (on hotfile...etc) then offer him yours.

He may just be too lazy to re upload and see it's cool opportunity to save effort, keep his vid alive and get free money!

2. Occasionally you'll find uploaders with VERY popular videos but no matter what you do they'll only agree on posting a "mirror".

In that case, just signup with fileserve or anything and mirror his file. You'll still earn quite a bit, of

course not like CPA but worth if the video is a goldmine.

Also if you want to go down the mirror road, you often won't have to pay anything as the uploader considers it some free "help" from you.

Sorry I know was kind of a long method. Maybe the very bases of the method were laid out before but I'm sure the twists weren't!

## Method 2:

On this technique I'll clarify detailed how one can make fast cash with no funding.

This technique makes use of CPA (Value Per Motion) to make the cash.

First you want a CPA community, I counsel to make use of cpagrip, they've an amazing obtain

widget that you could customise and that matches completely for this methodology

Now discover some chan websites to submit Right here a really small record

[4chan.org](http://4chan.org)

[7chan.org](http://7chan.org)

[List of chan website](#)

Now you want a topic. Greatest ones are scandals, celebrities, probably the most sick one of the best.

You then want an image associated to the topic, for positive you will see in google pictures one thing. Obtain a number of.

Usually the very best is to publish within the random parts nearly all have it .

Earlier than you submit, you must create the widget in CPAgrip go to MONETIZATION TOOL > URL / File Lockers .

In case you simply need to rip-off the folks simply use a file sharing hyperlink to a file that don't exist, if you wish to be trustworthy add the photographs/information someplace and use that hyperlink.

This file locker will solely give the hyperlink if the customers fill a small survey, in the event that they do you might be cashing.

Issues that you must learn about this methodology:

1. This websites are fairly spammed so you should be inventive with the hyperlink, use shorteners and don't use dots (.) to bypass the spam filter.
2. To make lot of submit in the identical web site you'll need proxies.I take advantage of HMA may be very low-cost and works nicely with this methodology, after a put up change the proxy three) Publish will probably be banned rapidly generally so you need to repeat the method if you wish to money correctly.

## Method 3

If you want to make about \$90/day follow these steps..this method work with [Cpagrip Sharecash](#)

- 1) You need to download uTorrent - this program is free and can be downloaded on their website .
- 2) Find a HOT topic to base this on. Check out the Upcoming Movie's list and pick a movie that is coming out in around a month from now.

I chose [Avengers : Endgame](#) which is going to release on 23rd April.

3) Find a trailer for that movie and download it. Use a Youtube downloader to download from Youtube.

4) Now rename the trailer to something like, "[Avengers : Endgame](#) LEAKED INTRO". The main words in this are "leaked intro". People would now be more interested.

5) Create a NEW WINRAR ARCHIVE. You should now have an empty archive with nothing in it.

6) Now go to your trailer, right click it, and then click "Add to Archive". You will get a box titled, "Archive name and parameters".

Go to the "Advanced" tab, and then click "Set password". After you have created your password, click "OK". Depending on where your output destination was, you should now see that archive you just made.

7) So, now you have 2 archives. One with the trailer which is password protected and one with nothing in it. Now, open the one with nothing in it and drag the archive with the trailer into it. Click "OK" if you get any message boxes.

8) Now when you open the archive we FIRST created, you will see that the trailer archive is inside and when you try to watch the trailer, it asks for the password. Yeah? Great.

9) Now close everything and open the archive we FIRST made. Now, create a NOTEPAD file. In the notepad file, write your password for the locked archive and save it as "READ ME- PASSWORD FOR LEAKED INTRO".

10) Make an account with [Sharecash](#) or [Cpagrip](#) and upload the text file. Now, people will have to complete a short survey to download the password. You get paid up to \$1 for each download.

11) Now create another notepad file and put in the download link for your sharecash or Cpagrip text file we just uploaded. Then save this file in your ARCHIVE and name it, "READ ME-PASSWORD". Make sure you do NOT password protect this.

12) **FINAL RESULT** - Now when people try to open the trailer, they will be asked to enter a password. They will then read the notepad file (which should not be password protected) and they will visit the sharecash or Cpagrip URL to download the password.

13) You will make money from this every time they download.

How do I actually create a torrent?

Now that you have actually made the whole file, you need to make it a .torrent to start uploading to websites like ThePirateBay.

- 1) Open uTorrent. Click "File" and then click "Create new torrent".
- 2) When it says "Select source", just find where you saved the archive and locate it. Then click "Add File"
- 3) Then click "Create and save as". You will then get a box asking you where you want the .torrent file saved. Just choose DESKTOP.
- 4) Now on your desktop, you will see a .torrent file with the uTorrent icon. Inside this torrent is the archive we just built!
- 5) Now go to websites like ThePirateBay and create an account with them. Then upload the .torrent file and watch as your money starts rolling in. On your first day, you won't make much but keep it going!

**P.S** - If your file gets removed from Thepiratebay, clear cookies, open a new account and repeat same process. And If you are new to utorrent or piratebay just google or YouTube to know more. Never stop - Information are in front of you.

## METHOD 4 - THE BEST

In this method, You have to search for a make money related article by typing

- How to make money
- How to make fast money
- How to make money with affiliate marketing
- How to make money with cpa
- How to make money with clickbank
- How to make money blogging
- How to make tons of leads
- How to get free traffic to make sales By typing these you will get thousands of make money articles.
  
- Now you can make a PDF with this article and lock that pdf with Cpagrip file locker or you can make a blog post on your free [blogger blogspot](#) website.

- Now find related youtube videos with your selected make money article. You will find a lot of videos with every categories.
- Now do commenting like this. ' Great info and i liked your video and subscribed . I have a great method ( Free ) to make money with affiliate marketing. You can download from here : Your locked Cpagrip url by locking that article in form of pdf or blog url.
- Try to comment on higher viewed videos to get best results.
- You can also make simple video on the basis of your selected article and put that locked URL in the video description. If you can do that trust me you will make \$200+ per day after working 20-30 days by making only 1 video per day.
- People will love to get free make money article ( they have to submit any free offer to download that ) And thus you make money.

Hope You've enjoyed my methods and don't forget to implement these methods. All of the methods works and will work. The only step required is your ACTION !

Sincerely

- A.I Saikat ( Lukmankim )

#### Surprise Bonus Download :

**3 Minutes App Traffic** : A fantastic way to get free traffic which makes up to \$200 everyday
